

RadianceRF[®]

MICRONEEDLING SYSTEM

INTRODUCING THE LATEST IN RF MICRONEEDLING

The RadianceRF[®] system elevates microneedling to the next level. This comprehensive treatment utilizes the precision of microneedling with the lasting benefits of radio frequency energy, targeting deep layers of the skin to stimulate collagen and elastin production.

Its versatility enables you to tailor treatments to meet your patients' unique needs—suitable for all skin types, any area of the body, and can be easily customized for maximum results with minimal downtime.

Key Features

Dual hand-pieces to meticulously deliver energy to the target area

User-friendly design with advanced programmable technology

Minimal downtime (makeup after 24 hours)

Adjustable needle depth up to 8mm (7mm + 1mm plus thermal profile) for accuracy and efficacy

Insulated microneedles ensure precise energy delivery

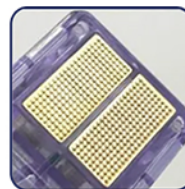

Automatic settings to easily delegate

MULTIPLE NEEDLE CARTRIDGES

Needles: Nano, 12pins, 24pins, 40pins
Depth: 0.1mm-7mm, adjustable

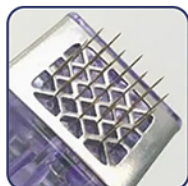

Nano Tip

Delicate and sensible on skin external surfaces

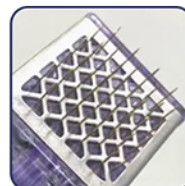

12 Pins

For small or smaller treatment areas

24 Pins

For face and neck

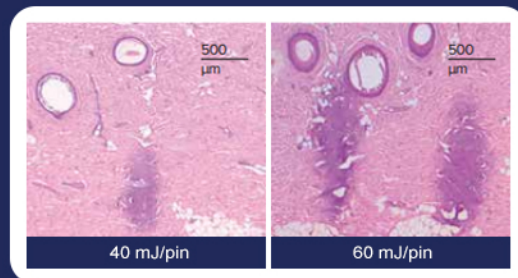

40 Pins

For use on the body for larger and deeper treatments

MULTI LAYER THERAPY

The RadianceRF® system features innovative technology that gives you full control over the procedure. You can adjust treatment depth and energy levels to deliver a multi-layered, customized approach for all skin types and tones. The natural healing process replaces the damaged zones with new collagen and elastin to ensure optimal results.

Precise and Adjustable Coagulation Zones
